

17-101

ORDINANCE NO. 2153

AN ORDINANCE TO AMEND ORDINANCE NO. 1960 WHICH IS AN ORDINANCE DECLARING THE INTENTION OF THE CITY OF ALBANY, OREGON TO ESTABLISH, OPERATE AND MAINTAIN, WITHIN AND WITHOUT THE CITY LIMITS OF THE CITY OF ALBANY, OREGON, A SEWAGE DISPOSAL PLANT OR PLANTS, CONVEIENT FOR A COMPLETE SEWER SYSTEM AND DISPOSAL PLANT OR PLANTS; IMPOSING AN EQUITABLE CHARGE, DECLARING CERTAIN ACTS UNLAWFUL AND IMPOSING PENALTIES AND DECLARING AN EMERGENCY.

The people of the City of Albany do ordain as follows:

That said Ordinance No. 1960 shall be amended by amending Section 3 thereof, Class III, as follows:

CLASS III: Industrial establishments discharging wastes into the sewer system from food processing operations.

- A. First 500 cu. ft. @ \$0.15 per 100 cu. ft.
- B. Next 1000 cu. ft. @ \$0.10 per 100 cu. ft.
- C. Next 2500 cu. ft. @ \$0.07 $\frac{1}{2}$ per 100 cu. ft.
- D. Next 90,000 cu. ft. @ \$0.05 per 100 cu. ft.
- E. All over 100,000 cu. ft. @ \$0.02 per 100 cu.ft.

(a) All quantities of waste for these industrial establishments are to be determined by the amount of metered water delivered to said premises from the water system of the Mountain States Power Company. In the event that any of these industrial establishments obtain water from other sources than the Mountain States Power Company water system, then and in that event, the industry concerned shall be required to install a meter at their expense and make the same available to the City of Albany for reading to determine the amount of waste actually discharged into the sewers.

(b) In the event that water, of whatever origin, is used in the manufacture of commodities for sale or used in cooling or similar purposes and is not discharged into the sanitary sewer system, then and in that event, the flow into the sewer from such industry shall be metered by and at the expense of the user of the sewer, and rates shall be based on the rate of flow into the sewer. In most cases the amount of flow into the sewer will be based on the amount of water delivered to the establishment in question from whatever source, less the metered amounts of water used in manufacture of commodities or in cooling and which does not reach the sanitary sewer system.

(c) All industries engaged in the packaging, canning or processing of fruits, vegetables, grain or other food products shall remove from their wastes all suspended matter of a size larger than that which will pass through a screen having 40 wires per lineal inch in two directions. This removal shall be accomplished in a rotary or vibrating mechanical screening unit of a design approved by the City Engineer.

(d) When any vacant lot which may be served by the sewage facilities of the City of Albany is improved, and when application is made for a sewer connection, the owner of said property shall pay a connection charge equal to 50 per cent of the minimum sewer service charges which will apply to the new structure from the effective date of this ordinance to the date of the said application. If said application is made after five years from the date of this ordinance, then the connection charge shall be based on the minimum sewer service charges for the five years immediately prior to the application. Provided, further that this connection charge shall only apply to residential or house connections, and that the Council may from time to time by resolution fix and determine such connection charges for other types of user, based upon data submitted by the applicant and studies made by the City Engineer as to the kind and quality of sewage to be discharged. The sum paid hereinbefore provided shall be deemed said applicant's share in paying the costs of disposal facilities that has been carried by other users.

Passed by the council December 28, 1949.
Approved by the Mayor December 28, 1949.
