

RESOLUTION NO. 987

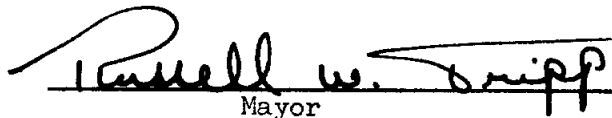

WHEREAS, Section 501 of Ordinance No. 3186, City of Albany, Ordinances, prescribes the method of computing charges to contributors of industrial wastes as defined in the ordinance, and

WHEREAS, Section 502 of Ordinance No. 3186 describes the method of apportionment of sewage plant operation and maintenance costs as being based on the ratio of measured or estimated yearly industrial waste flow to the total yearly treatment plant flow, and

WHEREAS, Section 502 also describes the method of apportionment of total fixed costs chargeable to industry as being based upon the flow of BOD and suspended solids contributed by each industry but does not clearly indicate that each industry shall be apportioned a portion of the fixed costs based upon the ratio of measured or estimated yearly flow of BOD and suspended solids contributed by industry to the yearly treatment plant flow of BOD and suspended solids, now therefore

BE IT RESOLVED that effective July 1, 1967, the annual computation of the apportionment of total fixed costs to be charged to industries shall be based upon the ratio of measured or estimated yearly flow of BOD and suspended solids contributed by individual industries to the total yearly treatment plant flow of BOD and suspended solids.

DATED this 8th day of February, 1967.

Mayor
